General Information:

Scholar Worldwide is one of the most prominent academic organizers in the Middle East and around the world. Through its vigorous activities, it organises and hosts a variety of conferences in the field of scientific research the disciplines of medicine, engineering, petroleum, administration, linguistics, and arts, social and applied sciences. Through its academic programs in the preparation and organisation of scientific conferences, Schwlar aspires to the following visions (i) seeks to establish academic relations with international universities and research centres on the globe, (ii) hosts scientific and academic conferences that enrich the scientific experience of university professors and give them the ability to present their ideas with transparency, benefiting from the exchange of ideas with other professors in similar fields.

Objectives:

Throughout the development of a five-year plan, Schwlar aims to promote the scientific research and prepare multidisciplinary scientific conferences at intervals of time, gathering scientists from around the world in a scientific discussion sessions, the sole objective of which is scientific and academic research. Schwlar also seeks to draw up an academic policy for the future, which is the preparation of legitimate scientific journals and published research that have gained academic and scientific recognition.

Strategy and Function:

Schwlar has been organising and hosting conferences that aim at gathering faculty members at all universities, as well as building on the strengths and addressing challenges in the evaluation of scientific research, in addition to the preparation of scientific reports and studies provided by the institution for the development of research and guidance to the most important problems experienced by some sectors. The most important strategy that will be implemented by the institution is the continuous follow-up to all sectors to ensure honest scientific research and provide valuable data, accurate figures, and scientific views. Schwlar's function is not limited to the organisation and preparation of conferences, but will also extend to include the society in finding scientific solutions to its problems and needs.

Vision:

Through its academic programs in the preparation and organisation of scientific conferences, Schwlar seeks to establish academic relations with international universities and research centres on the globe. Schwlar works toward hosting scientific and academic conferences that enrich the scientific experience of university professors and give them the ability to present their ideas with transparency, benefiting from the exchange of ideas with other professors in similar fields.

Scholar Worldwide Focus:

Schwlar seeks to gather world academics in one hall and enable them to exchange scientific ideas in an atmosphere full of harmony. Schwlar is open to university professors from all over the world, and in various disciplines, building bridges for scientific and cultural collaboration, enabling the exchange of different experiences and visions at different levels, in addition to the facilitation of a database of professors, their specialties and universities crossing all borders that prevent scientific communication. Schwlar aims, through the development of a five-year plan, to promote the scientific research and prepare multidisciplinary scientific conferences at intervals of time, gathering scientists from around the world in a scientific discussion sessions, the sole objective of which is scientific and academic research. Schwlar also seeks to draw up an academic policy for the future, which is the preparation of legitimate scientific journals and published research that have gained academic and scientific recognition.
